USER MANUAL

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

1. Purpose

This user manual provides the procedure described in the project document for using the Standard Laptop procurement automation in ServiceNow. It covers flow setup, Service Catalog assignment, ordering, approval, and Catalog Task verification.

2. Prerequisites

- Access to the ServiceNow instance used for the project.
- Permission to access Flow Designer and Service Catalog.
- Access to the Standard Laptop catalog item.
- Ability to process the relevant approval.

3. Create the Flow

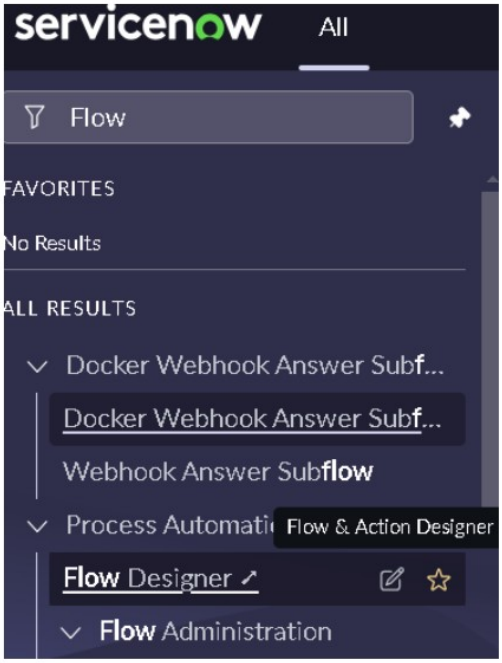

- Open ServiceNow.
- Click All and search for Flow Designer.
- Open Flow Designer under Process Automation.
- Click New and select Flow.
- Enter Standard laptop task as the Flow Name.
- Set Application to Global.
- Select System User as Run User.
- Click Submit.

- Verify the assigned group is Hardware.
- Verify the task status and approval information.

12. Scroll down to the " Catalog tasks " Section
13. Open the record to see the updated status of the record with Short description and Assigned group.

Conclusion :

By automating the standard laptop procurement process with ServiceNow's Flow Designer, the project effectively addresses inefficiencies and reduces manual overhead. This streamlined workflow ensures timely configuration of laptops, minimizes user wait times, and enhances overall productivity within the IT department. The implementation of this automated solution not only optimizes resource allocation but also significantly improves the user experience by providing a seamless and efficient procurement process.

Catalog Task verification

11. Expected Result

A successful execution results in a Catalog Task generated from the approved Standard Laptop request. The task contains the configured laptop description and is assigned to Hardware for configuration.

12. Troubleshooting Checks

- If the flow does not run, verify that it is activated.
- If the task is not created, verify the Service Catalog trigger and Requested Item mapping.
- If the task is not assigned correctly, verify Assignment group = Hardware.
- If the task is not generated after approval, verify Approval = Approved and the request approval status.
